Press Release

January 8, 2021

We are pleased to announce that, today, Analytical Technology, Inc. has been acquired by Badger Meter, Inc.

Founded in 1905, Badger Meter is an innovator in flow measurement, control and communication solutions. With global headquarters in Milwaukee, Wisconsin, Badger Meter serves water utilities, municipalities and commercial and industrial customers worldwide.

Over the past 28 years, ATi has exceeded expectations as a small, privately-owned company, growing to become an industry leader. This new partnership will have a positive impact on our business, bringing exciting opportunities for continued growth and allowing us to elevate the standard of service and solutions that we provide. We looked to partner with a leading organization that could help us achieve our ambitious goals, one with shared values, an innovative culture and commitment to environmental solutions, and it was clear Badger Meter was the right fit.

On a day-to-day basis, there will be no significant changes to our operations, and our customers will continue to interact with the same members of our staff that they have partnered with in the past. ATi offices and manufacturing will remain in Collegeville, PA. Over time, we will be working closely with the world-class Badger Meter team, and their existing water quality partner s::can GmbH, to deliver a wider-range of enhanced products and solutions. With these additional resources and capabilities, we will continue to deliver innovative monitoring solutions and data insights for water and gas applications to our valued customers.

About Analytical Technology, Inc (ATi)

ATi is a leading provider and innovator of water quality monitoring solutions, as well as toxic and combustible gas detectors, for municipal and industrial markets. Our pioneering and industry leading range of smart water distribution monitors, process control monitors and gas detectors are trusted to

deliver reliable information and provide strategic solutions for the most demanding of applications. For more information, visit www.analyticaltechnology.com

About Badger Meter

With more than a century of water technology innovation, Badger Meter is a global provider of industry leading water solutions encompassing flow measurement, quality and other system parameters. These offerings provide their customers with the data and analytics essential to optimize their operations and contribute to the sustainable use and protection of the world's most precious resource.
